

# Flip-in' Hinge

The patent pending **Flip-in' Hinge** is designed to allow a cabinet door to lift and recess into the interior of the cabinet with one effortless, fluid motion. A gas spring assists in opening and holds the door in the open position until closed by the user.

**\$220.00**  
includes S & H

*Made in USA*

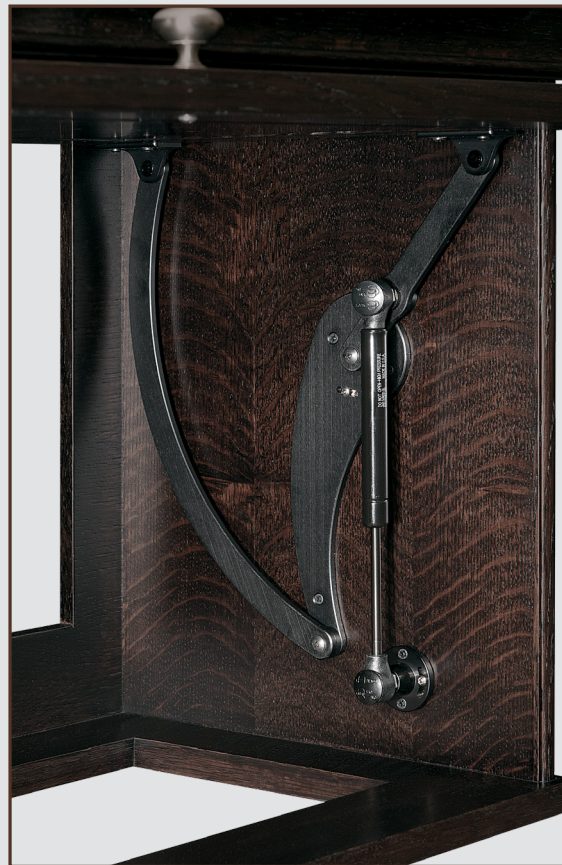

# Flip-in, Hinge

- The hinge is manufactured from black anodized aluminum with a tumbled mat finish. It is suitable for interior and exterior residential or commercial applications, aeronautical and marine environments and the recreational vehicle industry.
- Works on doors from  $\frac{3}{4}$ " – 1" thick and doors with applied moldings. Can be used in Under Cabinet, Full Overlay and Inset applications.
- Full scale installation files (PDF) and AutoCAD files (DWG/DXF) are available for download via the website.
